1.3 Place Value Chart

1.3.1 Indian Method

Periods	Crores		Lakhs		Thousands		Ones		
	TC	C	TL	L	T Th	Th	H	T	O
Place Value	Ten Crores	Crores	Ten Lakhs	Lakhs	Ten Thousands	Thousands	Hundreds	Tens	Ones

When we write large numbers we make use of place value chart to ensure that we do not miss any digit in between, while writing it. In a given number, starting from the right, the first three places make the ones period, the next two places make the thousands period, the next two places make the lakhs period and the next places make the crores period.

Try to read the number 359468421. Is it difficult? Yes. It is not easy. But by using the indicators or the periods, it is easy to read and write 359468421 as under.

Periods	Crores		Lakhs		Thousands		Ones		
Place Value	TC	C	TL	L	T Th	Th	H	T	O
Number	3	5	9	4	6	8	4	2	1
Number Name	35 Crores		94 Lakhs		68 Thousands		421 Ones		
	Thirty five crore ninety four lakh sixty eight thousand four hundred twenty one.								

Use of comma

In any given number, we separate the periods by using commas. In our Indian System of Numeration, we use commas from the right. The first comma comes before Hundreds place (3 digits from the right). The second comma comes before Ten Thousands place (5 digits from the right). The third comma comes before Ten Lakhs place (7 digits from the right) and the digits next to it represents crore.

Example 1.1

The distance between the Sun and the Earth is about 92900000 miles. Read and write the number in the Indian method.

Solution

Periods	Crores	Lakhs		Thousands		Ones		
Place Value	C	TL	L	T Th	Th	H	T	O
Number	9	2	9	0	0	0	0	0
Using Commas	9,29,00,000							
Number Name	Nine crore twenty nine lakh.
