Exercise 3.4

Miscellaneous Practice Problems

1. The maximum speed of some of the animals are given below :

   the Elephant = 20 k.m./h; the Lion = 80 k.m./h; the Cheetah = 100 k.m./h

   Find the following ratios of their speeds in simplified form and find which ratio is the least?.

   (i) the Elephant and the Lion (ii) the Lion and the Cheetah

   (iii) the Elephant and the Cheetah

2. A particular high school has 1500 students 50 teachers and 5 administrators. If the school grows to 1800 students and the ratios are maintained, then find the number of teachers and administrators.

3. I have a box which has 3 green, 9 blue, 4 yellow, 8 orange coloured cubes in it.

   (a) What is the ratio of orange to yellow cubes?

   (b) What is the ratio of green to blue cubes?

   (c) How many different ratios can be formed, when you compare each colour to anyone of the other colours?

4. A gets double of what B gets and B gets double of what C gets. Find A : B and B : C and verify whether the result is in proportion or not.

5. The ingredients required for the preparation of Ragi Kali, a healthy dish of Tamilnadu is given below.

Ingredients	Quantity
Ragi flour	4 cups
Raw rice broken	1 cup
Water	8 cups
Sesame oil	15 ml
Salt	10 mg

   (a) If one cup of ragi flour is used then, what would be the amount of raw rice required?

   (b) If 16 cups of water is used, then how much of ragi flour should be used?

   (c) Which of these ingredients cannot be expressed as a ratio? Why?
