Example 13: Raghu buys a chair for ₹3000. He wants to sell it at a profit of ₹500 after making a discount of ₹300. What is the M.P. of the chair?

Solution :

C.P. = ₹3000; Profit = ₹500; Discount = ₹300

S.P. = M.P. – Discount = M.P. – ₹300

Profit = S.P. – C.P.

₹500 = M.P. – ₹300 – ₹3000

M.P. = ₹500 + ₹300 + ₹3000 = ₹3800

Example 14: Mani buys a gift article for ₹1500. He wants to sell it at a profit of ₹150 on sales and he marks @ ₹1800. What is the discount that he will give to his customers?

Solution :

C.P. = ₹1500; Profit = ₹150; M.P. = ₹1800

S.P. = M.P. – Discount = ₹1800 – Discount

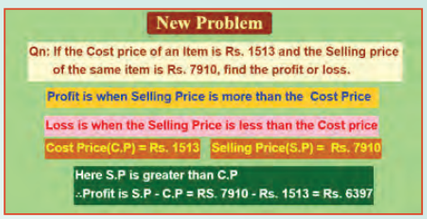

Profit = S.P. – C.P. $\Rightarrow$ ₹150 = ₹1800 – Discount – ₹1500

Discount = ₹1800 – ₹1500 – ₹150 = ₹150

BILL, PROFIT and LOSS

ICT CORNER

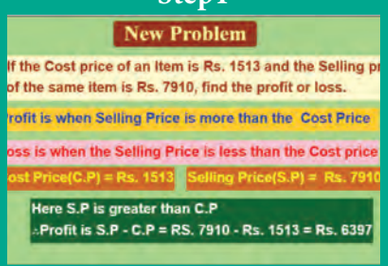

Expected Outcome

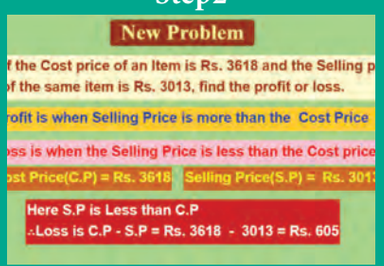

Step 1 Open the Browser and type the URL Link given below (or) Scan the QR Code. GeoGebra work sheet named "Profit and Loss" will open. The work sheet contains two activities. Click on "New Problem to change the problem. Read the given problem carefully.

Step 2 Work out yourself and check whether the answer is correct.
