Exercise 3.2

Miscellaneous Practice Problems

1. A shopkeeper buys three articles for ₹325, ₹450 and ₹510. He is able to sell them for ₹350, ₹425 and ₹525 respectively. Find the gain or loss to the shopkeeper on the whole.
2. A stationery shop owner bought a scientific calculator for ₹750. He had put a battery worth ₹100 in it. He had spent ₹50 for its outer pouch. He was able to sell it for ₹850. Find his profit or loss.
3. Nathan paid ₹800 and bought 10 bottles of honey from a village vendor. He sold them in a city for ₹100 per bottle. Find his profit or loss.
4. A man bought 400 metre of cloth for ₹60,000 and sold it at the rate of ₹400 per metre. Find his profit or loss.

Challenge Problems

5. A fruit seller bought 2 dozen bananas at ₹20 a dozen and sold them at ₹3 per banana. Find his gain or loss.
6. A store purchased pens at ₹216 per dozen. He paid ₹58 for conveyance and sold the pens at the discount of ₹2 per pen and made a overall profit of ₹50. Find the M.P. of each pen.
7. A vegetable vendor buys 10 kg of tomatoes per day at ₹10 per kg, for the first three days of a week. 1 kg of tomatoes got smashed on everyday for those 3 days. For the remaining 4 days of the week he buys 15 kg of tomatoes daily at ₹8 per kg. If for entire week he sells tomatoes at ₹20 per kg, then find his profit or loss for the week.
8. An electrician buys a used T.V. for ₹12,000 and a used Fridge for ₹11,000. After spending ₹1000 on repairing the T.V. and ₹1500 on painting the Fridge, he fixes up the M.P. of T.V. as ₹15,000 and that of Fridge as ₹15,500. If he gives ₹1000 discount on each find his profit or loss.

Summary

- Every bill of a purchase of goods contains the name of the shop from which the goods are purchased, the serial number, the date, the number of items, the rate, the amount of each item and the total amount of the bill etc.
- Selling Price (S.P.) is the price at which an item is sold.
- Profit is the difference between S.P. and C.P., when S.P. > C.P.
- Loss is the difference between C.P and S.P, when C.P. > S.P.
- Discount = M.P. – S.P. $\Rightarrow$ S.P. = M.P. – Discount.
