Example 1: In the flower exhibition conducted at Ooty for 4 days the number of tickets sold on the first, second, third and fourth days are 1,10,010; 75,070; 25,720 and 30,636 respectively. Find the total number of tickets sold.

Solution:

Number of tickets sold on the first day	= 1,10,010
Number of tickets sold on the second day	= 75,070
Number of tickets sold on the third day	= 25,720
Number of tickets sold on the fourth day	= 30,636
Total	= 2,41,436
Total number of tickets sold	**= 2,41,436**

Tree Diagram

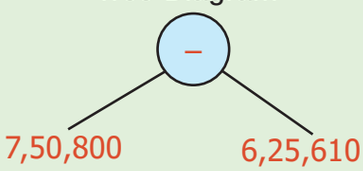

Example 2: In one year, a paper company had sold 6,25,610 notebooks out of a stock of 7,50,800 notebooks. Find the number of notebooks left unsold.

Solution:

Number of Notebooks in stock	= 7,50,800
Number of Notebooks sold	= 6,25,610
Number of notebooks left unsold	= **1,25,190**

Tree Diagram

Example 3: Vani and Kala along with three other friends went to a butter milk shop. The cost of one butter milk is ₹ 6. If 9 more friends joined them, then how much money did they have to pay? Vani said they had to pay ₹ 84 whereas Kala said they had to pay ₹ 59. Who is correct?

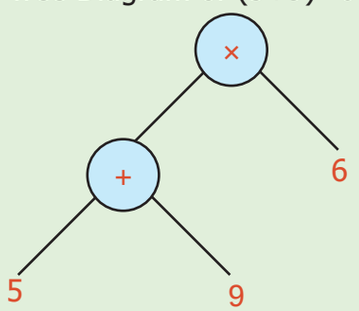

Solution:

This confusion can be resolved by using the brackets in the correct places like (5+9)×6.

It is further clear from the tree diagram.

Therefore Vani is correct

Tree Diagram of (5+9)×6

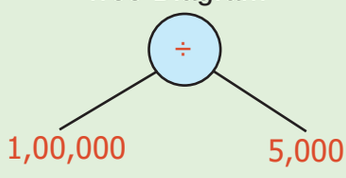

Example 4: If a ration shop has distributed 1,00,000 kg of rice to 5000 families, then find the quantity of rice given to each family?

Solution:

Quantity of rice to be distributed to 5000 families	=1,00,000 kg
Quantity of rice distributed to each family	=1,00,000÷5,000 =20 kg

Each family was given 20 kg of rice.
