Similarly, the other conversions can also be done. For example,

i) 1 cm^2 = 10 mm x 10 mm
= 100 mm^2

ii) 1 m^2 = 100 cm x 100 cm
= 10,000 cm^2

iii) 1 km^2 = 1000 m x 1000 m
= 10,00,000 m^2

Example 15 Fill in the blanks.

i) 2 cm^2 = _____ mm^2

ii) 18 m^2 = _____ cm^2

iii) 5 km^2 = _____ m^2

DO YOU KNOW?

1 acre = 4046.86 m^2

1 hectare = 10,000 m^2

Solution

i) 2 cm^2 = 2 x 100 = 200 mm^2

ii) 18 m^2 =18 x 10000 = 1,80,000 cm^2

iii) 5 km^2 = 5 x 1000000 = 50,00,000 m^2

Try these

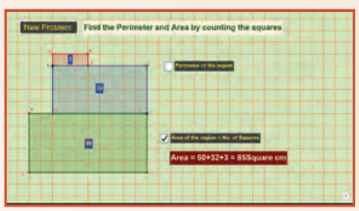

Fill in the blanks

i) 7 cm^2 = _____ mm^2 ii) 10 m^2 = _____ cm^2 iii) 3 km^2 = _____ m^2

Perimeter and Area

ICT CORNER

Expected Outcome

Step – 1

Open the Browser by typing the URL Link given below (or) Scan the QR Code. GeoGebra work sheet named "Perimeter and Area" will open. There is a worksheet under the title Counting by squares.

Step - 2

Click on New Problem and find the perimeter and Area of the shape by counting along the squares. Click on the respective check boxes to check your answer.

Step1

Step2

Browse in the link:

Perimeter and Area: https://ggbm.at/dxv8xvhr or Scan the QR Code.
