The flow of electric charge in a circuit is called Electric Current.

electricity

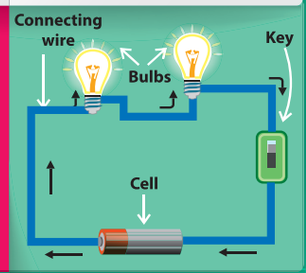

01 Simple Circuit

A circuit consisting of a cell, key, bulb and connecting wires is called a simple circuit

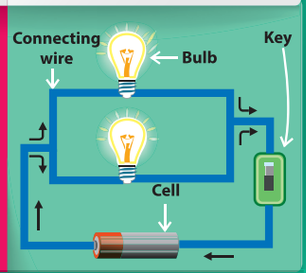

02 Series Circuit

A circuit consisting of a battery, key, bulbs and connecting wires connected in series is called a series circuit

03 Parallel Circuit

A circuit consisting of a battery, key, bulbs and connecting wires connected in parallel is called a parallel circuit

SECONDARY CELL

Secondary cells can be recharged by passing current and used again and again.

CONNECTING WIRE

Connecting wires are made up of conductors & covered with insulators

PRIMARY CELL

Primary cells can be used only once.
