Introduction

You might have seen magnets. Have you ever enjoyed playing with them?

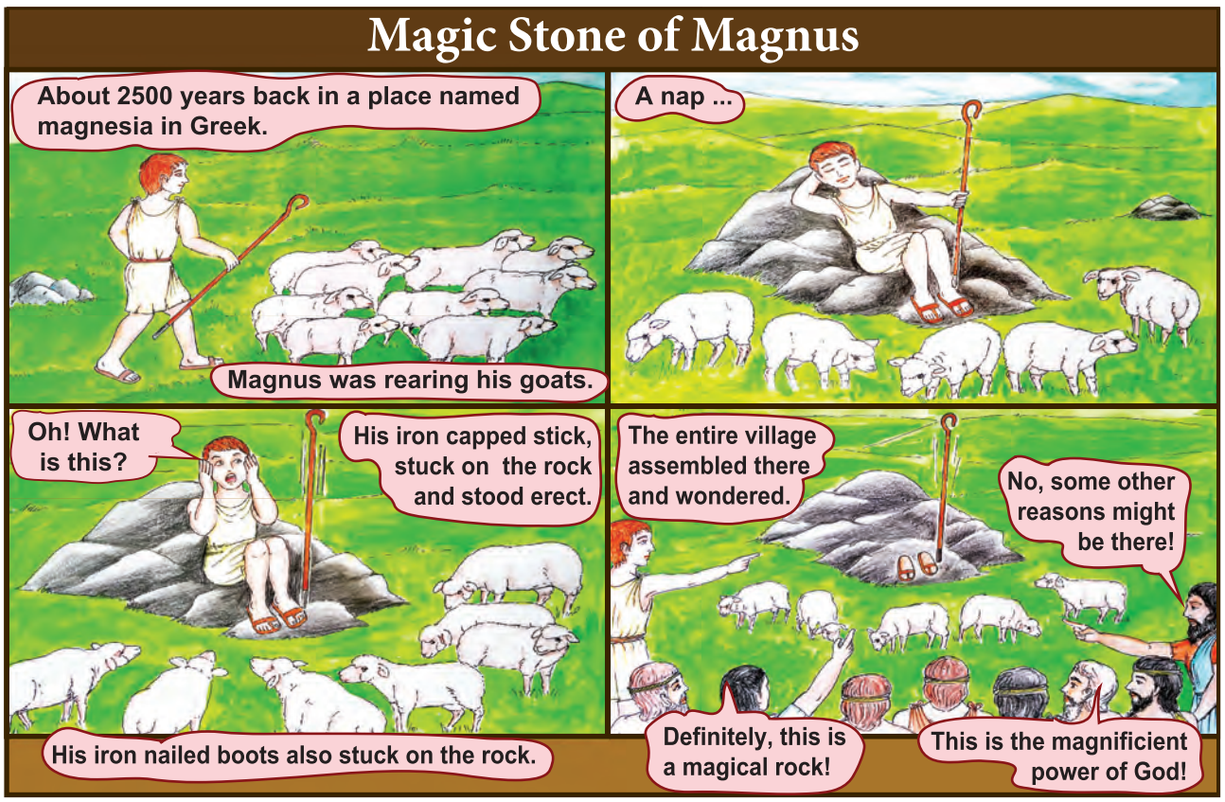

Take a steel glass. Take a needle through which thread is passed. Press the thread with a finger near the hole of the needle as shown in the figure and raise the glass upward slowly.

What happens?

Observe the same activity performed by your teacher and note it.

Does the needle stand vertically up without touching the glass? Why this happens?

1.1 Discovery of Magnets

People wondered about this incident, Each and everyone expressed their views. What might be the reason for the stick, to get stuck on the rock?

Yes, you are right. That is a magnetic rock. People found it attracting not only for the stick of Magnus, but also for all the materials made of iron. The more rocks of these kinds were found worldwide. These magnetic rocks were named **'Magnets'** and the ore is called as
