Gandhian thought on Resources:

There is enough for everybody's need and not for anybody's greed. Mahatma Gandhi blamed "human beings" for depletion of resources because of

(i) over exploitation of resources
(ii) Unlimited needs of human beings. So, conservation is very important.

Resource planning / Management

Resource planning is a technique or skill of proper utilization of resources. Resource planning is necessary because

(i) Resources are limited, their planning is quite necessary so that we can use them properly and at the same time we can save them for our future generation.
(ii) Resources are not only limited but also they are unevenly distributed over the different parts of the World.
(iii) It is essential for the production of resource to protect them from over exploitation.

CONSERVATION OF RESOURCES:

Careful use of resources is called **conservation of resources.** Resources are being used at a very fast rate due to the rapid increase in population. So, natural resources are depleting fast; wisely using resources can control the depleting ratios.

Development is necessary without affecting the needs of the future generations. If the present needs of resources are met and the conserving of resources for the future are balanced, we call it **sustainable development**. Sustainable development can take place when

(i) The reasons of depletion are identified.
(ii) Wastage and excess consumption is prevented.
(iii) Reusable resources are recycled.
(iv) Pollution is prevented.
(v) Environment is protected.
(vi) Natural vegetation and wild life are preserved.
(vii) Alternative resources are used.

The easiest way to conserve resources is to follow the '3R's: **Reduce**, **Reuse** and **Recycle**.

RECAP

- Anything that fulfills human needs can be called a resource.
- Resources provided directly by nature are natural resources.
- All living things are biotic resources.
- All non-living things are abiotic resources.
- Collection of resources directly from nature is called primary activities.
- Actual resources are being used at present.
